

Operating Instructions - Part No. 05520

1. Place webbing over load & attach hooks to solid anchor points.
2. Insert webbing through ratchet reel and pull until ALL slack is removed. (Figure 1).
3. Pump ratchet handle and wind 2 to 4 layers of webbing around reel to secure.
4. **CAUTION:** Too many layers of webbing will jam ratchet. Do not use reel to take up slack. If too much webbing is piling on reel, start procedure over, first removing ALL slack from webbing over load.
5. After load is secured, move handle down flat for transit. (Figure 2).
6. To release, compress release bar and open handle 180 degrees. (Figure 3).
